

Simplify connectivity for a
more productive world

Company Profile

Redtea Mobile stands at the forefront of eSIM/iSIM technology, serving as a trailblazer in device connectivity services. Our comprehensive eSIM solution ensures seamless cellular network coverage for a myriad of Consumer and IoT devices across the globe. To date, Redtea Mobile has empowered over 500 million devices, harnessing the power of global 3G/4G/5G network resources that span across 200+ countries and regions.

About Us

Embracing the mission "Simplify connectivity for a more productive world," Redtea Mobile, established in 2015, is committed to developing eSIM core technology for industry use. We simplify the intricacies of cellular networks into a flexible, reliable, scalable, and user-friendly connectivity service. Our innovative product solutions and business models cater to diverse customers, including mobile operators, device OEMs, chipsets, and module manufacturers, providing scalable IoT connectivity. With core values of "Integrity" and "Boldness," we navigate the challenges of "Connectivity" and "Scalability" in the emerging IoT era.

A Scalable IoT Connectivity Solution for M2M

RedteaReady acts as the crucial link between operators and devices, providing a practical solution for "last-mile" connectivity in diverse M2M applications. It ensures network connectivity upon powering on (plug & play), acts as insurance for continuous device connectivity (always-on), and facilitates connectivity management through an integrated aggregation of CMP. RedteaReady caters to multiple industry verticals, including automotive, retail, tracking, handheld terminals, smart metering, and more.

Redtea Mobile presents eSIM.plus, an end-to-end eSIM solution designed specifically for mobile operators. This comprehensive offering includes a GSMA SAS-SM certified Remote SIM Provisioning Platform (RSP) (SM-DP+), an Entitlement Server (along with Websheet server WS) tailored for wearables and companion devices, carrier Apps for eSIM applications and enablement, and the eSIM SDK catering to M2M/IoT devices. With its seamless digital experience, eSIM.plus, equipped with eSIM plugins, aims to elevate the capabilities of mobile operators. Discover more about this integrated solution at <https://esim.plus/>.

RedteaGO

Embeds your Smartphone with Global Data Service.

Introducing RedteaGO, empowering OEMs to provide users with global mobile data roaming services. Equipped smartphones autonomously generate digital local SIM cards based on the device's location, offering convenient data services in 200+ countries and regions. RedteaGO seamlessly integrates with diverse eSIM methods, supporting built-in data services for Android and a global data App for eSIM-capable iPhones and Android smartphones. Experience global internet access through a single App at <https://www.redteago.com/>.

Check out eSIM Access, a strategic initiative by Redtea Mobile, dedicated to delivering cutting-edge products to enterprise resellers and roaming data distributors. With eSIM Access, our partners in the domain can effortlessly provide connectivity services to their users. Leveraging top-notch technology from Redtea Mobile and a robust eSIM partnership with leading Consumer Electronic brands globally, we deliver a comprehensive range of seamless user experiences, ensuring coverage across 100+ countries and regions. Empower Your Brand with Our Exclusive Plans for Selling and Managing Travel Roaming eSIMs.

Enabler of CaaS - Connectivity as a Service

In 2018, we pioneered the concept of "CaaS, Connectivity-as-a-Service," channelling immense dedication into simplifying the conceptualization of "connectivity" by consolidating all cellular network capabilities. Our clients are relieved of the burden of acquiring network connections and managing cellular data packages, as these seamlessly integrate into an all-encompassing utility service. Much like IaaS, PaaS, and SaaS revolutionized cloud computing, we envision CaaS as the next paradigm for the IoT era.

Next-Level Solutions: Beyond Connectivity

Having garnered widespread industry acclaim with the introduction of CaaS, we, as a leading technology provider, have continued our journey of innovation. Expanding our portfolio, we now proudly offer "Provisioning-as-a-Service" and "xSIM-as-a-Service" to cater to the evolving needs of our clients. This strategic expansion signifies our commitment to providing comprehensive solutions that go beyond mere connectivity, ensuring a seamless experience across various facets of technology services.

Industry Recognitions

Redtea Mobile's journey has been marked by significant milestones, closely aligned with our customer's success. We take pride in our achievements, including our recognition as a China National High-Tech Enterprise, Associate Member of GSMA, and being part of the First Batch of China Unicom eSIM Alliance Members. Additionally, we are members of the China Mobile IoT Alliance, CCSA, TAF, and HUAWEI AIoT Associate.

Our accomplishments extend to co-hosting GSMA WAS#5, securing the ISPN partnership with Infineon, and the honor of being listed among the 100 Most Customer-Centric Companies by Forbes.

In a recent milestone, Deutsche Telekom recognized Redtea Mobile's capabilities, partnering with Qualcomm and Quectel to develop game-changing nuSIM technology for the IoT space. This collaborative effort has resulted in an innovative solution tailored for cost-efficient mobile IoT devices, addressing the evolving needs of applications with extended lifespans, such as asset trackers and smart sensors.
